

PROGRESS IN MOTION

For 50 years, Power-Packer has engineered a robust and innovative line of hydraulic position and motion control products for the transportation, medical and industrial markets. We specialize in developing and manufacturing hydraulic solutions for global OEMs and Tier 1 companies in diverse applications, including drive systems for convertible rooftops, truck cab tilt, stabilization legs, and stable and precise adjustment for medical equipment.

Part of the CentroMotion™ family of brands, Power-Packer has headquarters in the Netherlands and the U.S., and manufacturing plants strategically located worldwide to deliver state-of-the-art motion control solutions that fit your application or design challenge.

OUR MARKETS

- ▶ **MEDICAL**—Leading, global OEMs of patient beds, shower chairs, physical therapy tables, operating and treatment tables choose our hydraulic medical actuators.
- ▶ **MILITARY**—The military and other critical markets trust our specialized products and systems, including cab cylinders, latches and pump designs, gasoline and diesel hydraulic power units, and hydraulic flow control valves.
- ▶ **OFF-HIGHWAY**—Our hydraulic stabilization systems are utilized on underground drills, mobile all-terrain cranes, drill rigs, blasthole drills, rock crushers and similar types of off-highway equipment.
- ▶ **ON-HIGHWAY**—We supply hydraulic components for commercial vehicles, including work trucks, semitrailers, fire and rescue vehicles, delivery and waste trucks, and other cab-over-engine vehicles.
